WE HAVE ONLY GOOD THINGS TO SAY ABOUT CANCER OF THE COLON.

If detected early, the cure rate for colorectal cancer is very high. It can be as high as 75%.

Because we now know how to detect it early. And we know how to fight it once we detect it.

There are three simple checkup guidelines for men and women without symptoms.

One, get a digital exam every year. This is recommended for everyone over 40.

Two, get a stool blood test every year if you are over 50.

Three, after two initial negative tests one year apart, get a procto exam every three to five years if you are over 50.

These guidelines are the best protection against colorectal cancer you can have.

If you're not over 50, please give this information to friends and loved ones who are.

In any case, please help spread the word.

Good news doesn't always travel fast.

AMERICAN CANCER SOCIETY®

Get a checkup. Life is worth it.

Some People Commit Child Abuse Before Their Child Is Even Born.

According to the surgeon general, smoking by a pregnant woman may result in a child's premature birth, low birth weight and fetal injury. If that's not child abuse, then what is?
