

# TABLE OF CONTENTS

<i>Preface</i>	
The Editors .....	5429s
<i>Introduction I</i>	
Myron Essex .....	5430s
<i>Introduction II</i>	
Pelayo Correa .....	5431s

## Part I: Time Trends and Pathological Classification

<i>Non-Hodgkin's Lymphoma Time Trends: United States and International Data</i>	
Susan S. Devesa and Thomas Fears .....	5432s
<i>Changes in the Descriptive Epidemiology of Non-Hodgkin's Lymphoma in Great Britain</i>	
R. A. Cartwright .....	5441s
<i>Time Trends of Non-Hodgkin's Lymphoma: Are They Real? What Do They Mean?</i>	
Theodore R. Holford, Tongzhang Zheng, Susan T. Mayne, and Lisa A. McKay .....	5443s
<i>An Overview of the Classification of Non-Hodgkin's Lymphomas: An Integration of Morphological and Phenotypical Concepts</i>	
Elaine S. Jaffe, Mark Raffeld, L. Jeffrey Madeiros, and Maryalice Stetler-Stevenson .....	5447s
<i>Changes in Diagnosis of Non-Hodgkin's Lymphomas over Time</i>	
Peter M. Banks .....	5453s
<i>Pathological Classifications of Non-Hodgkin's Lymphoma for Epidemiological Studies</i>	
Dennis D. Weisenburger .....	5456s
<i>Discussion</i> .....	5462s

## Part II: Genetic and Environmental Determinants

<i>Primary Immunodeficiencies: Genetic Risk Factors for Lymphoma</i>	
A. H. Filipovich, A. Mathur, D. Kamat, and R. S. Shapiro .....	5465s
<i>Familial Aggregation of Hematopoietic Malignancies and Risk of Hodgkin's Lymphoma</i>	
Martha S. Linet and Linda M. Pottern .....	5468s
<i>Immunosuppressive Therapy and Immunological Disorders</i>	
Leo Kinlen .....	5474s
<i>Lymphoma Risks in Populations with Altered Immunity—A Search for Mechanism</i>	
Robert N. Hoover .....	5477s
<i>Viruses Other than HIV and Non-Hodgkin's Lymphoma</i>	
Nancy E. Mueller, Alejandro Mohar, and Alfred Evans .....	5479s
<i>Epidemiological and Biological Study of Acquired Immunodeficiency Syndrome-related Lymphoma in the County of Los Angeles: Preliminary Results</i>	
Alexandra M. Levine, Darryl Shibata, Jane Sullivan-Halley, Bharat Nathwani, Russell Brynes, Marilyn L. Slovak, Suzanne Mahterian, C. Lynn Riley, Lawrence Weiss, Paul H. Levine, Suraiya Rasheed, and Leslie Bernstein .....	5482s
<i>Pesticides and Non-Hodgkin's Lymphoma</i>	
Shelia Hoar Zahm and Aaron Blair .....	5485s
<i>Radiation and Non-Hodgkin's Lymphoma</i>	
John D. Boice, Jr. ....	5489s
<i>Nutritional Factors and the Development of Non-Hodgkin's Lymphoma: A Review of the Evidence</i>	
Scott Davis .....	5492s

<i>Increasing Incidence of Non-Hodgkin's Lymphoma: Occupational and Environmental Factors</i> Neil Pearce and Peter Bethwaite .....	5496s
<i>Comments on Occupational and Environmental Factors in the Origin of Non-Hodgkin's Lymphoma</i> Aaron Blair, Athena Linos, Patricia A. Stewart, Leon F. Burmeister, Robert Gibson, George Everett, Leonard Schuman, and Kenneth P. Cantor .....	5501s
<i>Non-Hodgkin's Lymphoma and Occupational Exposure</i> Paul A. Scherr, George B. Hutchison, and Richard S. Neiman .....	5503s
<i>Prior Medication Use and Health History as Risk Factors for Non-Hodgkin's Lymphoma: Preliminary Results from a Case-Control Study in Los Angeles County</i> Leslie Bernstein and Ronald K. Ross .....	5510s
<i>Does Chronic Fatigue Syndrome Predispose to Non-Hodgkin's Lymphoma?</i> Paul H. Levine, Daniel Peterson, Faye L. McNamee, Karen O'Brien, Gloria Gridley, Mary Hagerty, Jane Brady, Thomas Fears, Martin Atherton, and Robert Hoover .....	5516s
<i>Discussion</i> .....	5518s

### Part III: Molecular and Immunoregulatory Mechanisms

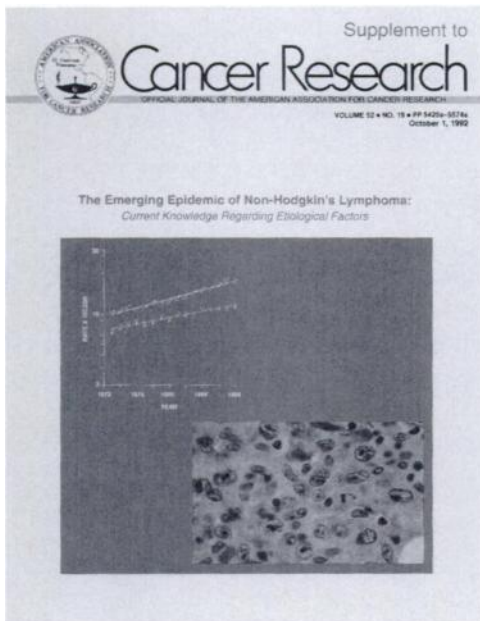

<i>Pathogenetic Mechanisms in B-Cell Non-Hodgkin's Lymphomas in Humans</i> Michael Potter .....	5522s
<i>Molecular Basis of Lymphomagenesis</i> Ian Magrath .....	5529s
<i>Characterization of Chromosome 11 Translocation Breakpoints at the bcl-1 and PRAD1 Loci in Centrocytic Lymphoma</i> Michael E. Williams, Steven H. Swerdlow, Carol L. Rosenberg, and Andrew Arnold .....	5541s
<i>A Measure of Genomic Instability and Its Relevance to Lymphomagenesis</i> Ilan R. Kirsch and Stanley Lipkowitz .....	5545s
<i>Antigen Selection in Human Lymphomagenesis</i> David W. Bahler, Andrew D. Zelenetz, Thomas T. Chen, and Ronald Levy .....	5547s
<i>Epstein-Barr Virus-induced Human B-Cell Lymphomas in SCID Mice Reconstituted with Human Peripheral Blood Leukocytes</i> Donald E. Mosier, Gastón R. Picchio, Stephen M. Baird, Ryo Kobayashi, and Thomas J. Kipps .....	5552s
<i>Follicular Dendritic Cells: B-Cell Proliferation and Maturation</i> Andras K. Szakal and John G. Tew .....	5554s
<i>The Past Is Prologue: The Use of Serum Banks in Cancer Research</i> Alfred S. Evans and Nancy E. Mueller .....	5557s
<i>Applications of Experimental Techniques to Epidemiological Studies of Non-Hodgkin's Lymphoma: Use of Archival Tissues</i> Paul H. Levine .....	5561s
<i>Discussion</i> .....	5562s

### Part IV: Summaries and Conclusions

<i>Quantification of the Impact of Known Risk Factors on Time Trends in Non-Hodgkin's Lymphoma Incidence</i> Patricia Hartge and Susan S. Devesa .....	5566s
<i>Time Trends and Pathological Classification: A Summary</i> G. Iris Obrams and Gregory O'Connor .....	5570s

<b>Research Directions and General Discussion: A Summary</b>	
Nancy E. Mueller and Joseph F. Fraumeni, Jr. ....	5571s
<b>Molecular and Immunoregulatory Mechanisms: A Summary</b>	
Michael Potter .....	5572s
<b>Conclusion/Perspective I</b>	
Myron Essex .....	5573s
<b>Conclusion/Perspective II</b>	
Pelayo Correa .....	5574s

## COVER LEGEND

Depicted on the cover are two of the components of this symposium which emphasize the problem being addressed. The graph at the *top*, taken from the report by Devesa *et al.* (this Supplement, pp. 5432s–5440s), documents the consistent rise in non-Hodgkin's lymphoma incidence for the past two decades. The photomicrograph at the *bottom* depicts a diffuse large cell lymphoma of monoclonal B-cell phenotype, one of the aggressive lymphomas contributing significantly to the non-Hodgkin's lymphoma increase. This tumor's name is derived from the resemblance of the tumor cells to large non-cleaved follicular center cells. Large cell lymphoma is one of the most common non-Hodgkin's lymphoma subtypes, accounting for approximately 20% of all cases (photomicrograph courtesy of Dr. Elaine Jaffe, National Cancer Institute, NIH, Bethesda, MD).
