Errata

There is an error in the article by Pajusola *et al.*, which appeared in the October 15, 1992 issue of *Cancer Research* (pp. 5738–5743). In Fig. 4, p. 5741, the lung cells hybridizing with the *FLT4* probe were interpreted as epithelial cells on the basis of examination by an experienced pathologist. Further analyses reveal that at least some of these cells also hybridize with the von Willebrand Factor probe. Therefore, they may be classified better as endothelial cells. Thus, the authors would like to correct this result and withdraw conclusions based on it elsewhere in the paper. A more detailed analysis will be reported elsewhere.
