Erratum

Two errors have been found in the article by Li *et al.*, which appeared in the November 15, 1993, issue of *Cancer Research* (pp. 5345–5349). The second to the last sentence of the Abstract should have read: “. . . and (b) that CD44v expression may play a role in the intracerebral spread of about **80%** of the brain metastases.” In addition, the last sentence of the Introduction should have read: “The results revealed that metastasis-related CD44 (CD44v) had a high incidence of expression (**80%**) among tumors which had metastasized to the brain but not among glioblastomas or glioma-derived cell lines.” This percentage is written correctly elsewhere in the text, and therefore these rectifications do not alter the content and conclusions of the study.
