FUTURE ANNUAL MEETINGS OF THE AMERICAN ASSOCIATION FOR CANCER RESEARCH

1996 April 20-24 Washington, DC
Abstract Deadline: December 1, 1995
1997 April 12-16, San Diego, CA
1998 March 28-April 1, New Orleans, LA

WORKSHOP ON HISTOPATHOBIOLOGY OF CANCER

The AACR will sponsor a workshop entitled "Histopathobiology of Cancer" at the Keystone Center in Keystone, Colorado, from July 9-16, 1995. This workshop is supported by a generous grant from the National Cancer Institute that will offset the costs of registration, housing, and meals for approximately 100 graduate students and postdoctoral fellows engaged in basic cancer research (including epidemiological studies). This intensive, one-week workshop will provide participants with a background in cancer biology, pathology, and cancer-related disciplines. The program consists of 28 hours of laboratory sessions, 11 hours of lectures, and at least 4 hours of poster sessions. The workshop chairperson for 1995 is Dr. Gary J. Miller of the University of Colorado School of Medicine. He will direct a faculty of outstanding cancer researchers who will head the various laboratory sections and present lectures on recent advances in the field of histopathobiology of cancer and other appropriate scientific disciplines. Information and application forms were mailed to AACR members in March. Nonmembers should request information and brochures from the AACR office.

WORKSHOP ON MOLECULAR BIOLOGY IN CLINICAL ONCOLOGY

The AACR will sponsor an intensive, one-week summer workshop on molecular biology designed for clinical oncologists in training and in their early academic careers at the Given Institute in Aspen, Colorado, June 30-July 7, 1995. Recent advances in molecular biology are becoming more and more relevant to the diagnosis, therapy, and management of cancer patients. The workshop will give clinical oncologists an opportunity to interact closely in an informal setting with experts in the field of molecular biology, learn their language and laboratory techniques, better understand relevant literature, and communicate more effectively with their basic science colleagues.

Stephen H. Friend of the Massachusetts General Hospital, L. Michael Glode of the University of Colorado School of Medicine, and Jennifer A. Pietsenpol of the Vanderbilt University School of Medicine will serve as chairpersons of the workshop and will invite a distinguished faculty to direct five 2½-hour laboratory sessions and deliver 15-20 hours of lectures. Generous support from the National Cancer Institute will provide funding for the registration fees, air fares, and hotel accommodations of 65 physicians in training and oncology fellows. Ten senior clinical oncologists will also be able to attend the workshop upon payment of a registration fee. The University of Colorado School of Medicine certifies this workshop for Category I credits toward the AMA Physicians Recognition Award.

Information and application forms were mailed to all AACR members in February. Nonmembers should request brochures from the AACR office.

WORKSHOP ON METHODS IN CLINICAL CANCER RESEARCH

This August the AACR will introduce a new, six-day summer workshop on clinical research methods designed for both oncologists in training and senior investigators. The workshop will take place at the Inn at Prospect Square in Park City, Utah, August 19-25, 1995. The overall goal of the workshop will be to educate clinical scientists in methods for clinical research and to encourage better clinical trial design so that new cancer treatments can be introduced more rapidly into general medical practice. A grant proposal has been submit-

ted to the National Cancer Institute requesting funds to offset the registration fees and housing and subsistence expenses of 100 clinical trainees. In addition, 25 senior investigators will be accepted to the workshop upon payment of a registration fee.

The Workshop Organizing Committee consists of Daniel D. Von Hoff, Chairperson, and Gary M. Clark (both of the University of Texas Health Science Center at San Antonio) and David S. Alberts (University of Arizona Cancer Center). They will invite and select a distinguished faculty that will deliver approximately 20 hours of lectures and direct four 2½-hour laboratory sessions in which 25-30 participants will work through specific problems in the design of clinical trials. In addition, registrants will be able to discuss their own current research projects with a small group of faculty and other students at two "Bring Your Own Problem" Sessions. The University of Texas Health Science Center at San Antonio certifies this workshop for Category I credits toward the AMA Physicians Recognition Award.

Information and application forms will be mailed to all AACR members in March. Nonmembers should request brochures from the AACR office.

AACR SPECIAL CONFERENCES IN CANCER RESEARCH

A number of meetings are now being organized in the AACR's new series of smaller scientific meetings. Following are the topics, dates, locations, and program committees for these meetings. When full details of each meeting are available, AACR members will be the first to receive complete brochures and application forms for participation in these important conferences. Nonmembers may receive this information by sending their names and addresses to Meetings Mailing List, American Association for Cancer Research, Public Ledger Building, 150 South Independence Mall West, Suite 816, Philadelphia, PA 19106-3483.
