**Table of Contents**

**MICROENVIRONMENT AND IMMUNOLOGY**

- **3747** Aberrant Expression of MHC Class II in Melanoma Attracts Inflammatory Tumor-Specific CD4\(^+\) T-Cells, Which Dampen CD8\(^+\) T-cell Antitumor Reactivity
  Marco Donia, Rikke Andersen, Julie W. Kjeldsen, Paolo Fagone, Shamaaila Munir, Ferdinand Nicoletti, Mads Hald Andersen, Per thor Straten, and Inge Marie Svane
  Précis: These results illustrate a novel immune escape mechanism used in melanoma cells that aberrantly express MHC class II molecules, which by attracting CD4\(^+\) T cells generate a local inflammatory response dominated by TNF, which thereby inhibits cytotoxic CD8\(^+\) T cells.

- **3760** Mast Cells Infiltrating Inflamed or Transformed Gut Alternatively Sustain Mucosal Healing or Tumor Growth
  Alice Rigoni, Lucia Bongiovanni, Alessia Barocchi, Sabina Sangaletti, Luca Danelli, Carla Guarnotta, Amy Lewis, Aroldo Rizzo, Andrew R. Silver, Claudio Tripodo, and Mario P. Colombo
  Précis: This study reveals that mast cells can favor colon tissue repair during inflammation but also promote high-grade tumors once they are initiated, with implications for understanding immune contributions during colon tumorigenesis.

- **3771** Tumor-Promoting Effects of Myeloid-Derived Suppressor Cells Are Potentiated by Hypoxia-Induced Expression of miR-210
  Muhammad Zaeem Noman, Bassam Ijanji, Shijun Hu, Joseph C. Wu, Fabio Martelli, Vincenzo Bronte, and Salem Chouaib
  Précis: These findings offer a preclinical rationale to investigate the use of miR-210 inhibitors oligonucleotides as adjuvants to boost immunotherapeutic responses in cancer patients, based on their ability to blunt the potent immunosuppressive effects of MDSC in the tumor microenvironment.

- **3788** IL17 Promotes Mammary Tumor Progression by Changing the Behavior of Tumor Cells and Eliciting Tumorigenic Neutrophils Recruitment
  Luciana Benevides, Denise Morais da Fonseca, Paula Barbim Donate, Daniel Guimarães Tiezzi, Daniel D. De Carvalho, Jurandyr M. de Andrade, Gislaíne A. Martins, and João S. Silva
  Précis: IL17 blockade represents an attractive approach for the control of invasive breast tumors.

**MOLECULAR AND CELLULAR PATHOBIOLOGY**

- **3800** A Threshold Level of Intratumor CD8\(^+\) T-cell PD1 Expression Dictates Therapeutic Response to Anti-PD1
  Shin Foong Ngio, Arabella Young, Nicolas Jacquelot, Takahiro Yamazaki, David Enot, Laurence Zitvogel, and Mark J. Smyth
  Précis: This study shows how PD1 levels in CD8\(^+\) T cells that are present in tumors can predict the treatment response to PD1 antibodies and how regulatory T cells participate in controlling this sensitivity, with immediate implications for addressing the timely question of which patients will respond best to this exciting immune checkpoint therapy.

- **3812** STAT3 Inhibition Enhances the Therapeutic Efficacy of Immunogenic Chemotherapy by Stimulating Type 1 Interferon Production by Cancer Cells
  Heng Yang, Takahiro Yamazaki, Federico Pietrocola, Heng Zhou, Laurence Zitvogel, Yuting Ma, and Guido Kroemer
  Précis: STAT3 inhibitors may improve the therapeutic benefits of anthracyclines through augmenting cancer cell-autonomous type 1 IFN response.

- **3823** Preclinical Characterization of Novel Chordoma Cell Systems and Their Targeting by Pharmacological Inhibitors of the CDK4/6 Cell-Cycle Pathway
  Adrian von Witteleben, Lukas T. Goerttler, Ralf Marienfeld, Holger Barth, André Lechel, Kevin Møller, Michael Höhn, Marko Kornmann, Regine Mayer-Steinacker, Alexandra von Baer, Markus Schütthess, Adrien M. Flanagan, Peter Möller, Silke Brüderlein, and Thomas F.E. Barth
  Précis: This study describes the characterization of a valuable new tool for studies of chordoma, a deadly and little understood tumor arising at vertebral bodies and the base of the skull, along with the identification of a candidate prognostic biomarker and molecular targeting strategy.

- **3832** Loss of RACK1 Promotes Metastasis of Gastric Cancer by Inducing a miR-302c/IL8 Signaling Loop
  Ling Chen, Lingsheng Tan, Xuelei Wang, Junjie Zhao, Hua Chen, Jing Qin, Weidong Chen, Zhenbin Shen, Zhaoqiong Tang, Quanguan Gan, Yuanynan Ruan, Yihong Sun, Xinyu Qin, and Jianxin Gu
  Précis: This study connects epigenetics and inflammatory cytokine control during tumorigenesis in gastric tissue, showing how an epithelium state affects key mediators in establishing a master-slave relationship in the tumor microenvironment.
Small-Molecule NSC59984 Restores p53 Pathway Signaling and Antitumor Effects against Colorectal Cancer via p73 Activation and Degradation of Mutant p53

Précis: The p53 pathway-activating compound reported in this study is highly novel, not only stimulating p73 expression and function but also targeting gain-of-function mutants of p53 that are expressed widely in human cancers, with potentially broad-reaching implications for cancer treatment.

Multiplex Genome-Edited T-cell Manufacturing Platform for “Off-the-Shelf” Adoptive T-cell Immunotherapies

Laurent Poirot, Brian Philip, Cecile Schiffer-Mannioui, Diane Le Clerre, Isabelle Chion-Sotinel, Sophie Demiani, Pierrick Potrel, Cécile Bas, Laetitia Lemaire, Roman Galetto, Cécile Bas, Laetitia Lemaire, Roman Galetto, Cécile Lebuhotel, Justin Eyquem, Gordon Weng-Kit Cheung, Aymeric Duclert, Agnès Gouble, Sylvain Arnould, Karl Pegg, Martin Pule, Andrew M. Scharenberg, and Julianne Smith

Précis: This study describes methods that overcome present limitations in generating patient-derived CAR T-cell therapy by using nonalloreactive T cells from third-party donors in a scalable manufacturing process that enables an “off-the-shelf” immunotherapy to be produced.

The SMARCA2/4 ATPase Domain Surpasses the Bromodomain as a Drug Target in SWI/SNF-Mutant Cancers: Insights from cDNA Rescue and PFI-3 Inhibitor Studies

Précis: These findings directly inform drug discovery efforts to translate synthetic lethal strategies into effective drugs and useful biomarkers in cancers that are driven by a mutated SWI/SNF transcription factor.

ABCG2 Transporter Expression Impacts Group 3 Medulloblastoma Response to Chemotherapy

Marie Morfouace, Satish Cheepala, Sadhana Jackson, Yu Fukuda, Yogesh T. Patel, Saghira Fatima, Daisuke Kawachi, Anang A. Shelat, Clinton F. Stewart, Brian P. Sorrentino, John D. Schuetz, and Martine F. Rousset

Précis: These findings offer a preclinical rationale to block ABCG2 transporter activity as a strategy to enhance the therapeutic efficacy of topotecan used to treat Group 3 medulloblastoma, a pediatric brain tumor that is particularly challenging to address clinically.

miR-634 Activates the Mitochondrial Apoptosis Pathway and Enhances Chemotherapy-Induced Cytotoxicity

Naoto Fujiiwara, Jun Inoue, Tatsuyuki Kawano, Kouunky Tanimoto, Ken-ichi Kozaki, and Joju Inazawa

Précis: This study shows how a little studied microRNA can alter the context in which cancer cells respond to chemotherapy-induced stress, improving efficacy in settings such as esophageal cancers, which are inherently resistant to chemotherapy.

CD38 in Hairy Cell Leukemia Is a Marker of Poor Prognosis and a New Target for Therapy

Nicolas Poret, Qiangwei Fu, Soizic Guibaud, Meyling Cheok, Katie Miller, Gordon Zeng, Bruno Queruel, Xavier Trousseau, Sylvie Galilgue-Zouitina, and Carl Simon Shelley

Précis: This study describes for the first time a biomarker that predicts the severity of hairy cell leukemia and provides preclinical proof that this same biomarker is a powerful new therapeutic target.

Hypoxia Drives Breast Tumor Malignancy through a TET-TNFα-p38-MAPK Signaling Axis

Min-Zu Wu, Su-Feng Chen, Shin Nieh, Christopher Benner, Luo-Ping Gai, Chia Ying Jan, Li Ma, Chien-Hung Chen, Tomaoki Hishida, Hong-Tai Chang, Yoah-Shiang Lin, Nuria Montserrat, Pedro Gascon, Ignacio Sancho-Martinez, and Juan Carlos Izpisua Belmonte

Précis: These results shed new mechanistic light on how hypoxic tumor microenvironments affect epigenetic programs in cancer cells to drive stem-like character and metastasis, suggesting new ways to eradicate cancer stem-like cells that are nurtured by such microenvironments.
ΔNp63α Promotes Breast Cancer Cell Motility through the Selective Activation of Components of the Epithelial-to-Mesenchymal Transition Program

Tuyen T. Dang, Matthew A. Esparza, Erin A. Maine, Jill M. Westcott, and Gray W. Pearson

Précis: The transcription factor ΔNp63α can initiate pro-migratory components of EMT while sustaining epithelial character, perhaps explaining the aggressive invasive behavior of certain epithelial-like cancers like basal cell breast cancers.

KAT6B Is a Tumor Suppressor Histone H3 Lysine 23 Acetyltransferase Undergoing Genomic Loss in Small Cell Lung Cancer

Laia Simó-Riudalbas,Montserrat Pérez-Salvia, Fernando Setien, Alberto Villanueva, Catia Mouzinho, Anna Martínez-Cards, Sebastián Moran, María Berdasco, Antonio Gomez, Enrique Vidal, Marta Soler, Holger Heyn, Alejandro Vaquero, Carolina de la Torre, Silvia Barceló-Batllori, August Vidal, Luca Roz, Ugo Pastorino, Katalin Szakszon, Guntram Borck, Conceição S. Moura, Fátima Carneiro, Ilse Zondervan, Suvi Savola, Reika Iwakawa, Takashi Kohno, Jun Yokota, and Manel Esteller

Précis: Understanding how genetic defects in histone modifier genes contribute to human cancer can identify common pathogenic processes and new predictive and prognostic markers.

Heparanase Enhances Tumor Growth and Chemoresistance by Promoting Autophagy

Anna Shteingauz, Ilanit Boyango, Inna Naroditsky, Edward Hammond, Maayan Gruber, Ilana Doweck, Neta Ilan, and Israel Vlodavsky

Précis: These findings illuminate the function of an enzyme implicated in tumor inflammation, angiogenesis, and metastasis in modulating autophagy in cells, thereby conferring cell growth advantages under stress and resistance to chemotherapy.

Notch1 Activation or Loss Promotes HPV-Induced Oral Tumorigenesis

Rong Zhong, Riuyue Bao, Pieter W. Faber, Vytautas P. Bindokas, John Bechill, Mark W. Lingen, and Michael T. Spiotto

Précis: Strikingly, a functional screen for candidate driver genes in HPV-associated squamous cancers revealed that either gain or loss of Notch1 can promote tumor growth, by distinct pathways, suggesting great caution in the interpretation of putative driver mutations linked to cancer development.

Maspin Expression in Prostate Tumor Cells Averts Stemness and Stratifies Drug Sensitivity

M. Margarida Bernardo, Alexander Kaplun, Sijana H. Dzinic, Xiaohua Li, Jonathan Irish, Adelina Muser, Benjamin Jakupovic, Jessica B. Back, Eric Van Buren, Xiang Han, Ivory Dean, Yong Q. Chen, Elisabeth Heath, Wael Salz, and Shijie Sheng

Précis: These results offer evidence that the epithelial-specific molecule maspin limits tumor cell plasticity in the prostate, thereby dictating drug sensitivity and offering a biomarker in experimental screens for curative chemotherapy.

LETTERS TO THE EDITOR

G-CSF Is a Cancer Stem Cell–Specific Growth Factor—Letter

John M. Maris, Jason Healy, Julie Park, Ruth Ladenstein, and Ulrike Pötzchger

G-CSF Is a Cancer Stem Cell–Specific Growth Factor—Response

Eugene S. Kim, Saurabh Agarwal, and Jason M. Shohet

CORRECTIONS

Correction: Identification of Cyclin D1 and Other Novel Targets for the von Hippel–Lindau Tumor Suppressor Gene by Expression Array Analysis and Investigation of Cyclin D1 Genotype as a Modifier in von Hippel–Lindau Disease

Correction: Mutant p53 Enhances Nuclear Factor κB Activation by Tumor Necrosis Factor α in Cancer Cells
ABOUT THE COVER

Mast cells located in the gut move in areas of mucosal damage during the process of resolution of acute inflammation and repair. Their activity helps the quenching of inflammatory stimuli, as demonstrated by the delayed tissue repair occurring in mast cell-deficient mice. Mucosal healing is restored upon reconstitution of tissues of mast cell-deficient mice with bone marrow-derived mast cells, as indicated by histology showing the recovered crypt architecture characterizing the intestinal mucosa of reconstituted mice. These pieces of information imply a positive role of the mast cell in the resolution of intestinal inflammation and mucosal healing, which eventually becomes detrimental when transformation towards cancer occurs. For details, see article by Rigoni and colleagues on page 3760.
