

Supplementary figure 1

A) Western blots of SKP2 and E2F1 expression in HCT116 (lane 1 and 2), SW480 (lane 3 and 4) and HeLa (lane 5 and 6) cells 24 hours after the treatment of cells with 25 μ M Ly294002. The membrane was stripped and probed for β -actin to ensure equal protein loading. **B)** Semiquantitative SKP2 mRNA expression analysis. 24 hours after the treatment of HCT116 (lane 1 and 2), SW480 (lane 3 and 4) and HeLa (lane 5 and 6) cells with 25 μ M Ly294002, total RNA was prepared and SKP2 mRNA levels were analysed using semiquantitative RT-PCR. Cyclophilin mRNA served as a control.
