

Supplementary figure 4

Supplementary figure 4. (A) ELISA assay measuring the concentration of TNYL-RAW-Fc protein in plasma 7 days after hydrodynamic injection of the TNYL-RAW-Fc plasmid. Data represent mean \pm SD from measurements using different mice ($n=2$). **(B)** Inhibition of EphB4-ephrin-B2 signaling by TNYL-RAW-Fc does not affect immune cell populations in the circulation of Ly2 tumor-bearing mice.
