

Supplementary figure 5

A Difference in tumor volume +/- CD8 depletion in BALB/c mouse model

B CD8 depletion confirmation by flow

Supplementary figure 5. Systemic depletion of CD8+ T cells results in increased tumor growth in Ly2 tumors treated with TNYL-RAW-Fc (A). Confirmation of CD8+ T cell depletion by flow cytometry (B). Student's t-test or one-way ANOVA was used to calculate the significance of the differences between the groups. *p<0.05
